Art Unit: 1774

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a method of making composite, classified in class 264, subclass 109.
- II. Claims 32 and 33-57, drawn to a composite, classified in class 428, subclass 292.1.

If group II is elected, applicant is required to elect a single disclosed species for the isocyanate form claims 48 and 49. Select one.

If group II is elected, applicant is required to elect a single disclosed species for the release agent from claim 39 and 44. Select one.

2. The inventions are independent or distinct, each from the other because:

3. Inventions group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and material different method adding, adding mixing, heating, pressing, cooling, and storing.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1774

5. A telephone call was made to Goran Stojkovich on 5/18/06 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Stojkovich requested a written election.
